

In furtherance of Union Proposal 29, we can now advise that our survey results (as provided) have now been calculated in the area of employee safety.

Here is our suggestion:

The union will immediately retain an expert in the area of employee safety to study and assess Gas Bar safety issues. The company shall fully cooperate. The expert shall make recommendations that result in very high levels of safety for all employees. The company shall implement the recommendations of the expert immediately. The company shall reimburse the union for all costs.
