SAY NO TO CONVERSION THERAPY

What is it?

Any measure taken to **CHANGE, SUPPRESS, REPAIR** or **DEMEAN** a person's sexual orientation, gender identity or gender expression.

Who practices it?

It can be practiced by any person, business or organization.

What does research say?

The World Health Organization and the Canadian Psychological Association stand against it and deem it unethical and unscientific. Research has shown long-term negative impacts for conversion therapy survivors.

What does the government say?

Bill C-6 is the federal government response to end conversion therapy. However, it only applies to minors in Canada. Legislation needs to protect all persons and it needs to involve comprehensive sanctions for those found practicing it. It needs to support survivors!

Why should I care?

3 in 5 Canadians oppose conversion therapy (*2019 opinion poll*).

Bottom line:

Conversion therapy is **WRONG!**
